

HOW I GET TO SCHOOL

This is the route I take to get to school when walking or biking.

Along with an adult practice your safe route to school and draw a map of your route. Include your house, school, streets and anything else important you may see along the way. Be sure to practice this route before walk and bike to school day on May 5, 2021.

1. Practice your route with an adult before your school's National Walk and Bike to School Day Celebration.
2. Wear bright or reflective colored clothing and make sure shoe laces are securely tied.
3. Don't forget your bike helmet if biking to school.
4. Always walk or ride with an adult when possible, if not possible walk with a friend.
5. Leave early enough so you don't feel rushed.
6. Walk or ride your bike on the sidewalk. If there isn't a sidewalk always ride your bike on the right side of the road the same direction as traffic and walk on the left side facing traffic.
7. Cross at intersections whenever possible. STOP at  all crossings. Look left, right, and left again and if there is a signal only cross when the is flashing white. Make eye contact with drivers so you know they see you.
